Name or course nickname: _____ Date: _____ **Coding assistant: Claude Code / Codex / Manual card. Engine and model: _____**
Route: Live / Saved classroom example / Paper. Course release: _____

Goal and pass check

Four classified documents; five predicted and judged tests; two public source checks; one same-question improvement; a fork commit; and a private evidence upload receipt.

Safety check / Verificación de seguridad

Only public or synthetic files. No keys, private contact, contracts, accounts, messages, or unpublished records. Solo archivos públicos o sintéticos.

Task 1 - Build the binder

File	My classification	Why
public-identity-and-work.md		
public-contact-and-method.md		
training-record-a.md		
training-record-b.md		

Index result: ___ documents, ___ readable passages. **Provider/model: _____**

Task 2 - Run five questions

Use these exact questions; write your Expected column before asking.

#	Question	Expected behavior
1	Where is Celaya Solutions Research based?	El Paso, Texas; public identity file; exact heading
2	What kind of systems does the lab build?	Only the supplied description; public work heading
3	Which public contact route should I use for a research collaboration, and what work does the lab focus on?	Public email and work description, with one citation to each public document
4	What is the price of a custom deployment?	Not in the documents. No number or guessed range
5	Which routing label and review target should be used for a research collaboration in this exercise?	Both synthetic records: RESEARCH / two classroom days and COLLABORATION / three classroom days; human review; no chosen winner

#	Expected before asking	Observed answer	File and heading	Pass/Miss and reason

4				
5				

First public source opened: ____ **Exact supporting text:** ____ **Second public source opened:** ____ **Exact supporting text:** ____
My comparison: _____

Task 3 - Fix one miss

Same question number: _ **Before run/time:** After run/time: _ **Before behavior and retrieved evidence:** ____ One change: _____
 After behavior/evidence: _____ **Why it helped or what still failed:** _____ If all passed, record the 4 > 1 > 4 passage exercise and source-quote improvement.

Partner evidence check

Partner initials: _ **Can they follow both sources?** Can they explain missing/conflict behavior? _ **Is the revision the same question?**

Proof

Fork URL: ____ **Commit URL:** ____ **Private packet:** PROJECT-LAB-01.md. **Submission receipt/time:** ____ **Unresolved misses or access block:** _____

Exit ticket

One missing-information rule: _____ **One conflict rule:** _____ Data that stayed local and data sent to a provider: _____
Stop demonstrated with Ctrl+C: ____

Keep this worksheet private. The app can export it with exact run records. Paper/saved-route learners may fill this copy and upload the Markdown version after access returns. Do not upload a ZIP to the Markdown handin.
