Nickname: _____ Date: _____ Computer/OS/RAM: _____

Route: own computer / partner computer / saved / mixed. Name the route for every row.

Goal and pass check

An observed offline answer or a labeled fallback; six benchmark rows with model identity, size, total time, and your quality verdict; one checked source; a named model tested before and after one rule edit; and a written local-versus-cloud choice.

Safety check / Verificación de seguridad

- ☐ Supplied public/synthetic prompts only; no private records or keys.
- ☐ Localhost listener checked; no router port or public tunnel.
- ☐ Other course model jobs closed before comparison.
- ☐ Prepared online; downloaded models before disconnecting.

Task 1: Offline observation

Prediction before run: _____

Model name, full digest, bytes, Ollama version: _____

Checked wifi / Ethernet / USB tether / other links: _____

Disconnected at: _____ Restored at: _____

Partner observation and nickname (or Not observed): _____

Actual answer and receipt filename: _____

Total completion seconds: _____

Verdict and limits: _____

If saved/connected, write why offline execution was Not performed: _____

Task 2: Fair benchmark

Predict before running: which model suits each task, and why? _____

Expected source location/work/headings: _____

Expected arithmetic and your independent calculation: _____

Same computer, fixed prompts/options, unload-before timing confirmed: _____

Model/test	Route and receipt	Bytes/digest	Total seconds	Score 1-3 or failed	Reason/correction
1B writing					
1B source					
1B arithmetic					
4B writing					
4B source					
4B arithmetic					

Source opened: _____ Heading(s): _____

Answer claim checked: _____

Supported / unsupported / incomplete, and why: _____

Limit or failed rows kept visible: _____

Choice for daily writing on this computer, with a tradeoff: _____

Task 3: Named helper and one-rule retest

Name: zta-desk:latest. Base model/digest: _____

Original job, rules, and stop rule: _____

Before normal answer and receipt: _____

Before missing price/date answer and verdict: _____

Prediction for the one-rule change: _____

Route: manual / Claude Code / Codex. Exact changed line: _____

After normal answer and receipt: _____

After missing price/date answer and verdict: _____

Two sentences, under 50 words, deadline/reply retained: _____

Did missing information still stop? _____

What improved, failed, or was restored? _____

Code test result (separate from answer quality): _____

Partner

Reviewer nickname: _____

Can they trace the observation, six rows, independent check, and before/after? _____

One correction requested and made: _____

Proof

- [] Actual/saved/connected rows clearly identified; no invented timings.

- [] Private worksheet saved as PROJECT-LAB-03.md.

- [] All before/after attempts and a local-versus-cloud reason included.
- [] Active requests stopped and external connections restored.
- [] Uploaded to Level 3 and reopened, or marked Not submitted. Upload filename/time and reopen check:

Exit ticket

One job I would keep local, and why: _____

One public/synthetic job where I might choose cloud, and what would leave: _____

One thing an offline answer does NOT prove: _____

What creating the named model changed, and what it did not: _____
