Keep this file private as .zta/showcase/PROJECT-LAB-05.md. Put safe evidence excerpts here; local file paths alone cannot be graded remotely. Retain original receipts privately.

Name or course nickname: _____ Date: _____

Chosen project: Documents / Watchman / Local Model / Front Desk

User and job: _____

Goal and pass check

Eight items: ownership, before state, tested change, normal run, failure route, privacy or security fence, stop or fallback, and cost plus reflection; followed by a three-minute class presentation. Label live, saved, authored example, and not-performed evidence; reopen the Level 5 upload or mark Not submitted.

Safety check / Verificación de seguridad

- [] Only public or synthetic data appears in this worksheet and shared screen.
- [] Keys, account details, unrelated tabs, and notifications are hidden.
- [] Every result has an evidence label and its actual date, or Not performed.
- [] No private folder, full bill, or secret is attached. Sin datos privados ni claves.

Task 1 - Eight-item proof board

For each item include a safe excerpt, original receipt location, date, label, and limit. Labels: Live / Saved learner run / Authored example / Not performed.

1. Ownership

Local project or safe fork reference; my own choice and explanation: _____

Evidence label/date; what this does and does not prove: _____

2. Before state or unmet need

Original input, expected behavior, actual before, receipt/label/date: _____

3. One tested change

Exact rule/setting changed; reason; same-input after excerpt and receipt: _____

Other settings held stable; verdict Improved / Unchanged / Worse / Not performed: _____

4. Normal run

Input and expectation written before run: _____

Actual safe excerpt, receipt, label/date, verdict and limit: _____

5. Failure route

Input or condition and expected safe result: _____

Actual safe excerpt, receipt, label/date; Meets / Miss / Failed / Truncated / Not performed: _____

6. Privacy or security fence

Control location; data/actions allowed and excluded; limit of claim: _____

Safe evidence excerpt, label/date: _____

7. Stop or fallback used

Action and time; observed result; receipt or safe observation: _____

Live stop / Saved stop / Opened fallback / Not performed: _____

What could already have happened, or remains running: _____

8. Cost and reflection

Copy the filled cost sheet inputs/calculation here. Include currency, monthly tasks, calls/task, selected model or No model, token counts/rates or Local, source/date or Hypothetical, host total, electricity, hardware, at least one review hour, other costs, and one-time setup separately.

Inputs and sources/assumptions: _____

API calculation or why not applicable: _____

Monthly floor = API + host + power + hardware + review + other: _____

Three-times line; unknown/excluded costs; main assumption: _____

What improved; what still needs a person; next safe check: _____

Task 2 - Final checks

A fresh run means new execution; fixed inputs can repeat. Do not relabel an old result.

- [] Prediction written before normal and failure runs.
- [] Same-input repair comparison kept, including misses.
- [] Normal, failure, and stop/fallback have separate actual evidence.
- [] Saved and authored results are labeled; incomplete live checks remain visible.

For an existing deployed project only: browser behavior receipt; service health receipt; persistence receipt or Not claimed:

Task 3 - Three-minute presentation

Use the presentation card. Fill these lines and time one rehearsal.

Part	Target seconds	My line or evidence
Outcome	30	
Normal result	60	
Before, change, after	45	
Fence and used stop/fallback	30	
Cost and next step	15	

Actual rehearsal seconds: _____

Presentation route: Live / Saved / Recorded / Partner-read / Paper / Mixed

Partner or self-review

Reviewer initials or Self: _____

- [] I can locate all eight items and repeat the normal check.
- [] I see the miss, one change, and an honest after verdict.
- [] I see a used control or opened fallback and its limit.
- [] Costs include human review; unknowns are explicit.
- [] The screen and worksheet are safe to share.

Works 1/2/3: ____ Honest 1/2/3: ____ Theirs 1/2/3: ____

One revision and response: _____

Proof and submission

Presentation date, route, and reviewer observation: _____

Own build/run/edit/stop checks still Not performed: _____

Final worksheet saved, closed, and reopened locally: _____

Level 5 upload time and receipt; reopened contents checked: _____

Submission: Submitted and reopened / Not submitted. Blocker and next action: _____

Exit ticket

One project I will keep using: _____

One job a person must still own: _____

Final stop state and next safe check: _____

Muestra el trabajo, el fallo y la corrección: _____
