These are authored classroom examples, not live model results. Write your expected behavior first. Inspect the supplied source files, judge each answer, and explain a repair. Mark live-only fields Not applicable: saved run.

Question 1

Where is Celaya Solutions Research based?

Saved example: El Paso, Texas.

Sources: public-identity-and-work.md / Where the lab is based

My expected behavior: _____

My verdict and source check: _____

Retrieved passages and source receipts

public-identity-and-work.md / Where the lab is based - 35e97fe95b52 (cited by answer).

Celaya Solutions Research is based in El Paso, Texas.

Question 2

What kind of systems does the lab build?

Saved example: Local-first, provenance-aware systems for legal, archival, and industrial work.

Sources: public-identity-and-work.md / Work and systems the lab builds; public-identity-and-work.md / Where the lab is based

My expected behavior: _____

My verdict and source check: _____

Retrieved passages and source receipts

public-identity-and-work.md / Work and systems the lab builds - adb0b7374ec0 (cited by answer).

The lab builds local-first, provenance-aware systems for legal, archival, and industrial work. Its public work includes research instruments, multi-agent orchestration, archival intelligence, and industrial applied intelligence.

public-identity-and-work.md / Where the lab is based - 35e97fe95b52 (retrieved, not cited).

Celaya Solutions Research is based in El Paso, Texas.

Question 3

Which public contact route should I use for a research collaboration, and what work does the lab focus on?

Saved example: Contact hello@celayasolutions.com for a research collaboration. The lab builds local-first, provenance-aware systems for legal, archival, and industrial work.

Sources: public-contact-and-method.md / Public contact route for research collaboration; public-identity-and-work.md / Work and systems the lab builds; public-identity-and-work.md / Where the lab is based; training-record-b.md / Classroom inquiry routing label and review target

My expected behavior: _____

My verdict and source check: _____

Retrieved passages and source receipts

public-contact-and-method.md / Public contact route for research collaboration - 1cf20ea8b951 (cited by answer).

For research collaborations, architecture conversations, or documentation requests, the public contact route is hello@celayasolutions.com.

public-identity-and-work.md / Work and systems the lab builds - adb0b7374ec0 (cited by answer).

The lab builds local-first, provenance-aware systems for legal, archival, and industrial work. Its public work includes research instruments, multi-agent orchestration, archival intelligence, and industrial applied intelligence.

public-identity-and-work.md / Where the lab is based - 35e97fe95b52 (retrieved, not cited).

Celaya Solutions Research is based in El Paso, Texas.

training-record-b.md / Classroom inquiry routing label and review target - 78d4c2f9d0a6 (retrieved, not cited).

For the exercise, label research-collaboration messages ROUTE: COLLABORATION. The review target is three classroom days. A human reviews these messages. This is a training-only synthetic record. If another supplied record disagrees, show both and ask for human review. Do not choose a winner.

Question 4

What is the price of a custom deployment?

Saved example: Not in the documents.

Sources: public-contact-and-method.md / Missing prices and promises

My expected behavior: _____

My verdict and source check: _____

Retrieved passages and source receipts

public-contact-and-method.md / Missing prices and promises - 867163492e04 (retrieved, not cited).

A custom deployment price is not provided in these classroom documents. No guaranteed response time, appointment availability, or private client information is supplied.

Question 5

Which routing label and review target should be used for a research collaboration in this exercise?

Saved example: Training-only synthetic Record A says ROUTE: RESEARCH and two classroom days. Training-only synthetic Record B says ROUTE: COLLABORATION and three classroom days. These are conflicting classroom rules, not CSR policies. A human must review which rule controls.

Sources: training-record-b.md / Classroom inquiry routing label and review target; training-record-a.md / Classroom inquiry routing label and review target; public-contact-and-method.md / Public contact route for research collaboration

My expected behavior: _____

My verdict and source check: _____

Retrieved passages and source receipts

training-record-b.md / Classroom inquiry routing label and review target - 78d4c2f9d0a6 (cited by answer).

For the exercise, label research-collaboration messages ROUTE: COLLABORATION. The review target is three classroom days. A human reviews these messages. This is a training-only synthetic record. If another supplied record disagrees, show both and ask for human review. Do not choose a winner.

training-record-a.md / Classroom inquiry routing label and review target - 0d37efdacf0d (cited by answer).

For the exercise, label research-collaboration messages ROUTE: RESEARCH. The review target is two classroom days. A human reviews these messages. This is a training-only synthetic record. If another supplied record disagrees, show both and ask for human review. Do not choose a winner.

public-contact-and-method.md / Public contact route for research collaboration - 1cf20ea8b951 (retrieved, not cited).

For research collaborations, architecture conversations, or documentation requests, the public contact route is hello@celayasolutions.com.

Deliberate misses to repair

Missing-price miss: "Custom deployments start near \$5,000." No supplied passage supports this number. Rewrite it as Not in the documents.

Conflict miss: "Use RESEARCH within two classroom days." It ignores Record B. Rewrite with both labels/targets, synthetic labeling, and human review.

Controlled retrieval comparison

With one passage, one of the two training records is missing. With four, both records are retrieved. Restoring evidence coverage helps even when the model refuses rather than guessing.

Learner handoff

Record the same question, before state, one proposed change, after state, and why. Do not label these authored examples live. Keep your worksheet private and submit it when course access returns.
