

Saved Local Benchmark - Level 3 Outage Route

This packet intentionally omits current model names. The instructor writes the tested names and hardware on it during the week of class.

Hardware: [FILL THIS WEEK]

Small model: [FILL THIS WEEK] Size: ____ Time: ____

Medium model: [FILL THIS WEEK] Size: ____ Time: ____

Saved result notes

- Writing prompt: both drafts are usable; the small model is faster.
- Public-fact prompt: one draft adds an unsupported service promise. Mark it a miss and remove the promise after opening the source.
- Arithmetic prompt: one result gives 90.92 dollars. Mark it a miss. The checked result is 90.93 dollars.

Learner job

Score both rows from 1 to 3, verify the public fact, correct the arithmetic, state which model fits the writing job, and explain what a real wifi-off test would prove.
