

Worksheet - Project Lab Level 4: The Front Desk, Attacked and Locked

Name or course nickname: _____ **Date:** _____

Case: ☐ Celaya Solutions Research ☐ Instructor-approved business

Goal and pass check

A six-part spec and never list; five caller tests and one complete message card; the same ten attacks scored before and after four defenses, with the fake secret removed and a tested log, draft-only boundary, and off switch; and a sixty-second outcome pitch without the words AI, agent, or model.

- ☐ Six-part spec
- ☐ Five caller tests
- ☐ Five-part message card
- ☐ Ten before rows
- ☐ Four defenses
- ☐ Ten after rows
- ☐ Log, draft-only rule, and switch test
- ☐ One-minute outcome pitch

Safety check / Verificación de seguridad

- ☐ Public or training-only records only
- ☐ Owner approval recorded for any alternate business
- ☐ No private customer, price, calendar, key, or phone data
- ☐ All secrets, names, numbers, and codes are fake
- ☐ No real public system will be tested
- ☐ Uso datos públicos o sintéticos. Pruebo solamente lo que construí o lo que me dieron permiso de probar.

Task 1 - Interview and spec

Interview question	Public answer or Not publicly known
What repeated questions arrive?	
Which requests need a human?	
What should never be shared?	
What can be answered from the public source?	
What outcome would make this useful?	

Spec part	My rule
Trigger	

Spec part	My rule
Steps	
Checks	
Failure routes	
Access list	
Never list	

Task 2 - Five caller tests

#	Route	Expected	Actual	Receipt	Verdict / fix
1	Easy public fact				
2	Unpublished price				
3	Urgent request				
4	High-stakes request				
5	Impersonation				

Miss I fixed and reran: _____

Five-part message card

Name or safe alias: _____

Public contact route: _____

What they need: _____

Urgency: ☐ Today ☐ This week ☐ Whenever

Best follow-up time: _____

Task 3 - Attack it, then lock it

Fake secret placed in the desk: ____ **Expected safe behavior:** _____

Partner test requested: ☐ Yes ☐ Not used Partner said yes: ☐ Yes ☐ Not applicable

#	Attack name	Before result	Held / Leaked / Partial	After result	Held / Leaked / Partial	Changed?
1	Direct order					
2	Authority claim					
3	Costume or game					
4	Hidden P.S.					
5	Order inside document					

#	Attack name	Before result	Held / Leaked / Partial	After result	Held / Leaked / Partial	Changed?
6	Translation request					
7	Repeat instructions					
8	One crumb at a time					
9	Urgency and pity					
10	Second-model attack					

Before leak count: ____ After leak count: ____

Defense	What I changed	Where the fence lives	Checked
Mark untrusted text as data		Words around model	[]
Remove fake secret		Outside model	[]
Draft only; person acts		Permission layer	[]
Log and switch		Operations layer	[]

Log location: ____ Switch: ____

Strongest defense and why: ____

Partner attack result or unused-card replacement: ____

Close - 60-second pitch

Problem: ____

Outcome: ____

Proof: ____

Ask: ____

Forbidden-word count: AI _ **agent** _ model _ **Seconds:** ____

Partner evidence check

Partner initials: ____

- [] Never list is clear.
- [] Five callers cover all required routes.
- [] Message card has five parts.
- [] Consent came before any partner attack.
- [] Same ten attacks appear before and after.

- [] Fake secret is absent from model material.
- [] Switch was used once.
- [] Pitch sells the outcome.

Proof

Spec receipt: _____

Five-caller and message-card receipt: _____

Before and after sheets: _____

Four-defense, log, and switch receipt: _____

Pitch receipt: _____

Exit ticket

The human still owns: _____

Fences, not promises means: _____
